Biography

Emma Villas

Emma Villas is a passionate and driven individual, currently pursuing a degree in Computer Science with a specialization in Software Engineering and Data Analytics from Trent University, Durham. Recently, Emma was also accepted into Georgia Tech's Online Master of Science in Computer Science program, further demonstrating her commitment to advancing her knowledge and skills in the tech field.

In her role as IT Associate Director at Oshawa Community Credit Union, Emma is dedicated to ensuring the Credit Union remains secure, accessible, and forward-thinking, all while preserving its core values.

Emma's experience spans across various sectors, starting from her co-op position as an Application Developer at a School Board, where she developed practical problem-solving and technical skills, to her volunteer work with Habitat for Humanity, where she helped create a mobile app to better serve the community.

In addition, Emma has worked at two startups, gaining hands-on leadership, marketing experience, and project management skills while developing innovative solutions in fast-paced, impact-driven environments. She is also actively involved in volunteering to design and develop websites for environmental non-profits, further demonstrating her commitment to leveraging technology for the greater good.

Emma hopes to bring a fresh perspective while respecting the credit union's deep-rooted traditions. They are passionate about leveraging technology and strategic planning to help continue serving its members effectively, ensuring financial security and accessibility for all.

Emma looks forward to working alongside fellow Board members to strengthen the credit union's mission and create meaningful, lasting benefits for the community.
